- GitHub Profile

Detail-oriented Software Tester with experience in quality assurance, incident management and stakeholder collaboration across automotive and public sector projects.

Passionate about improving software quality through structured testing, problem solving and close teamwork. Currently expanding my skills within Full Stack C# .NET Web Development and modern frontend technologies.

CORE STRENGTHS

- Problem Solving
- Communication
- Stakeholder Collaboration
- Attention to Detail
- Calm Under Pressure

WORK EXPERIENCE

2025-08 - 2025-10

The Swedish Tax Agency

Software Tester

- Contributed to test strategy planning in collaboration with client and supplier teams
- Reviewed and evaluated supplier Test Design Documents
- Designed and structured test documentation in Confluence
- Configured Jira boards and Zephyr test plans in accordance with project standards
- Created and maintained test cases and test execution plans in Zephyr
- Facilitated collaboration and communication between project stakeholders
- Helped establish the project's testing structure, processes and documentation during its startup phase before the project was discontinued following a government decision

2021 - 2025

WirelessCar

Software Tester / Incident Management

- Managed production incidents and performed root-cause investigations
- Performed API testing and verification using Swagger and Postman to support production stability and defect resolution
- Monitored system health using Kibana, Grafana and OP5
- Provided production support and coordinated issue resolution with developers
- Performed regression testing for web portals and mobile applications
- Supported system availability through monitoring, troubleshooting and maintenance activities within AWS environments
